

Lajos HELYES

(Hungary)

E-mail: helyes.lajos@mkk.szie.hu

His main research areas: Effect of water supply, irrigation on yield quantity and quality of vegetable crops (tomato, sweet pepper, eggplant, broccoli, carrot, onion). Irrigation scheduling and timing. My research activities have been supplemented - parallel with nutritional and international research expectations - with the evaluation of determinants of vegetable quality and organoleptically important components (special regards to biologically active components). The number of scientific publications: 169 independent citations: 457
