

Werner EUGSTER

(Switzerland)

E-mail: werner.eugster@usys.ethz.ch

Werner Eugster is interested in biosphere–atmosphere exchange processes with a strong emphasis on eddy covariance flux measurements of energy fluxes, greenhouse gases, but also photochemical constituents and stable isotopes. In addition to his geographical focus on Central Europe, he has also been involved in Arctic tundra research and Mongolian steppe ecosystems. As a specialty he also is interested in fog–vegetation interaction and all fog-related aspects of ecosystem research.
